

Delivering Exceptional Services & Software Every Time

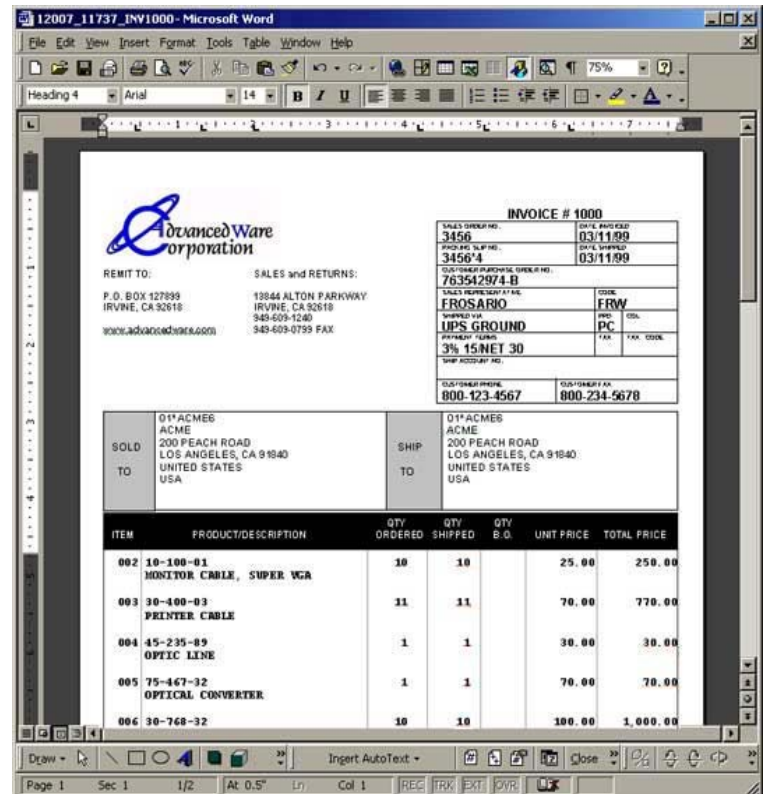

AdvancedWare is Pleased to Present AWForms - \$2,100

Avanté, DataFlo, ManFact or MANAGE 2000 users can now say goodbye to the costs, hassles and functionality limitations of pre-printed forms or any other forms package. With AWForms from AdvancedWare you can easily email (both PDF & Word formats), fax, print, and view on a PC screen any of your business forms.

Features of AWForms:

1. AWForms utilizes the printing engine in Microsoft Word so any printer (Network or attached to your PC) works great. The graphics are crisp and clear in both color as well as black and white. AWForms supports both landscape and portrait style forms.
2. AWForms can be automatically emailed (in both PDF and Word formats) and/or faxed (with automatic logging and notification). You can even "mix and match", so if your customer wants the forms automatically faxed to them but you want your internal copies automatically distributed via email, AWForms has this built in.
3. Making changes is easy with AWForms because there are no complex scripting languages to learn. In fact, you actually use Word to make changes to the form templates such as fonts, colors, graphics, etc. With AWForms you will be making these types of changes to your forms in minutes instead of hours or days.
4. AWForms supports printing of bar codes on any of the forms.
5. AWForms is release independent and therefore will run with any release of Avanté, DataFlo, ManFact or MANAGE 2000.

One of the great features of AWForms is the ability to view the actual form on the screen, see example below:

Our Turnkey Approach: For the price of \$2,100 AWForms includes the combination of products and services needed for your company to be up and running live.

The Bottom Line: With AWForms you will have the ability to automatically email, fax, print and view your Avanté, DataFlo, ManFact or MANAGE 2000 form documents.
