

Delivering Exceptional Services & Software Every Time

## AdvancedWare is Pleased to Present AWFedExInterface for DataFlo - \$4,000

The AWFedExInterface product automatically loads from your DataFlo system all the information required by FedEx for a shipment. Once you complete the shipment in the FedEx system, all the information such as Shipment Cost, Total Weight, Number of Packages, and Tracking Number(s) are then automatically loaded into your DataFlo system. AWFedExInterface streamlines the shipment process and eliminates errors caused by having to maintain redundant customer address information.

Below you can see the flow of the AWFedExInterface process. In one simple step, the information is automatically loaded into the FedEx system and is ready to be processed. Then, with a click of the mouse the information is automatically loaded from FedEx into your DataFlo system.

**Sending Shipment Information to FedEx Ship Manager from DataFlo.**

**Receiving into DataFlo the Shipment Cost, Total Weight, Number of Packages and Tracking Number(s) from FedEx Ship Manager.**

The image shows two overlapping software windows. The top window is from DataFlo, displaying shipment details for a shipment ID of 1012. It includes fields for Customer (AdvancedWare Corporation), Address 1 (13844 Alton Parkway, Suite 138), City (Irvine), State (CA), Postal Code (92618), Ship Via (Next Day Air), and Tracking #s (65885046048). The bottom window is the FedEx Ship Manager interface, showing recipient information (Country: US, City: Irvine) and sender information (Company name: AW Customer Domestic, Address 1: 13844 Alton Parkway, Irvine, CA 92618). It also displays package and shipment details like 'Number of packages: 1' and 'Weight: 2.5'. Arrows indicate the flow of information between the two systems.

**Our Turnkey Approach:** For the price of \$4,000, AWFedExInterface includes the combination of products and services needed for your company to be up and running live. We include the installation and setup of AWFedExInterface on your system and full integration to your release of DataFlo, even if you have customization.

**The Bottom Line:** With AWFedExInterface, your users will be able to ship directly from your DataFlo system using FedEx and capture all the required information in a snap. Best of all, AWFedExInterface provides an unlimited license to run on as many shipping stations as you like.
