

AdvancedWare is Pleased to Present AWCreditCard for Epicor Kinetic - \$6,500

Fully automated and secure processing of Credit Card transactions right from within your Epicor Kinetic system is now available with AWCreditCard. When you enter an Order into your Epicor Kinetic system, AWCreditCard will automatically validate the Card Information and perform the Authorization Transaction for the amount of the Order. The Authorization Transaction reserves the funds against the Card so that the Card can be charged when you Ship/Invoice the products. When you do the Shipment/Invoice transaction in your Epicor Kinetic system AWCreditCard will automatically perform the Capture Transaction which charges the Card for the actual Invoice amount.

AWCreditCard performs these functions without ever storing any Credit Card information which is critical for PCI Compliance. Also, you have many choices when it comes to Credit Card processors such as Authorize.NET, CyberSource, PayTrace, PayPal, Payeezy etc. AWCreditCard works with all of them so you can decide on the Credit Card processor that has the best rate and works the best for you.

Our Turnkey Approach: For the price of \$6,500, AWCreditCard includes the combination of products and services needed for your company to be up and running live. We include the installation and setup of AWCreditCard on your system and full integration to your release of Epicor Kinetic, even if you have customization.

The Bottom Line: With AWCreditCard, you will have secure and automatic Credit Card transactions performed from your Epicor Kinetic system.

To arrange for a demonstration or to order your copy of AWCreditCard please give us a call at (949) 609-1240
